Combining the latest in digital imaging technology with full network capabilities, Copystar's CS-2050 and CS-1650 are redefining the way companies do business.

The CS-2050 and the CS-1650 offer powerful, flexible imaging capabilities, designed specifically to meet the growing needs of small-to-medium sized workgroups and businesses. These systems can handle the demands of everyday printing and copying, expanding the imaging possibilities for any work environment.

Both robust performers, these document imaging solutions offer easy-to-use print, copy, scan and fax features that **increase desktop productivity**. In addition, seamless integration into your existing network and advanced administrative tools provide the ability to **intelligently control** and **manage** your company's document workflow.

Exceptional output, enhanced document control, and low Total Cost of Ownership— it's easy to see why the CS-2050 and CS-1650 are a **smart choice** for your growing business requirements.

NETWORK/PRINT

Standard Network and Print Capabilities to Enhance Productivity

Print speeds of 20 letter size sheets per minute for the CS-2050 and 16 letter size sheets per minute for the CS-1650 combined with crisp, clean 600 x 600 dpi output to enhance the document imaging capabilities of any network. Both multifunctionals offer a standard **Network Interface** and a standard **Print Controller** that are capable of integrating into virtually any printing environment including PC, MAC, and Linux/Unix. The ability to support most common software protocols and PDL/Emulations brings added versatility.

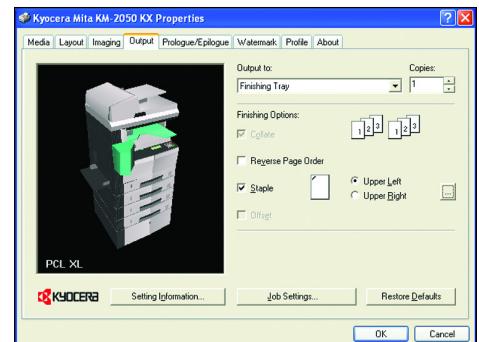

Supporting the CS-2050 and CS-1650 are Kyocera-designed **intelligent device solutions**, enabling users to easily set output criteria, while offering administrators the ability to smartly manage their network – all from the convenience of the desktop. The advanced **KX Driver**, common to all Copystar multifunctionals, ensures consistency, compatibility and integration, regardless of the network system. Users and administrators can effortlessly **customize print settings** and **select output features** from the desktop, enhancing overall document imaging productivity.

The web-based Kyocera Command Center interface facilitates the setting of network parameters and printing by simply entering the assigned IP address. **KM-NET Viewer** and **KM-NET for Client** provide an additional level of support by allowing network administrators to view systems and manage output. For added flexibility, our **PRESCRIBE** solution enables users to create and store forms and letterhead for output as needed, eliminating costly pre-printed materials and the extensive storage space they require.

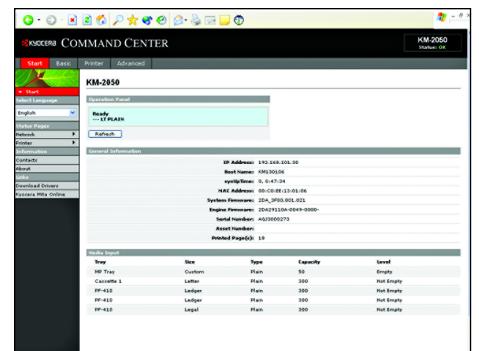

KM-NET Viewer

Network administrators can monitor and maintain all Copystar and other SNMP compliant devices directly from the desktop. Oversee network configuration, check paper levels, change device defaults, as well as set auto reporting, e-mail notification, and alerts.

KX Driver

The user-friendly KX Driver features a common interface, allowing users and administrators complete control of the output process.

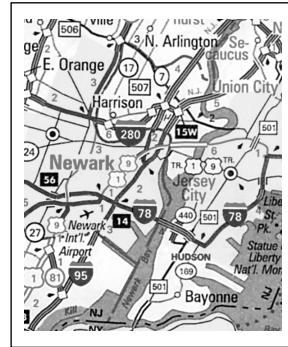

The Kyocera Command Center

Users can easily set network parameters and print specifications by entering assigned IP addresses.

SCAN

Advanced Scanning Enables Enhanced Document Imaging Abilities

The advanced scanning capabilities of the CS-2050 and CS-1650 bring document flexibility to any business. Users can quickly scan up to 20 sheets per minute, transforming hard copy into TIFFs or PDFs, with resolutions of up to 600 dpi. **Scan to File** abilities enable these images to be electronically archived, eliminating the need for hard copy filing and storage. To boost productivity even further, the **Scan to E-Mail** feature allows users to transmit their business critical documents instantly to any e-mail address.

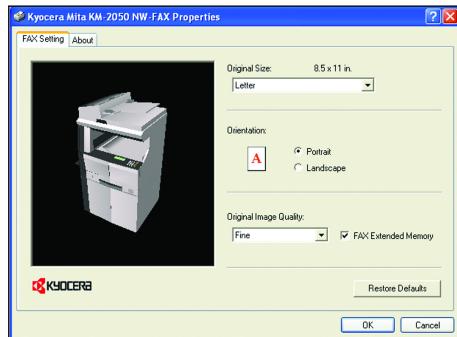

High Resolution Scanning

Documents can be scanned to E-Mail or File as PDF or TIFF images, at resolutions up to 600 DPI.

FAX

Full Fax Capabilities from the Convenience of the Desktop

Equally convenient and economical are the CS-2050 and CS-1650's **Super G3 Facsimile** capabilities. A 33.6 Kbps modem and transmission speeds of 2 seconds per page make both units comparable to most standalone fax machines, while offering the added convenience of **Network Fax**. Users can send and receive messages directly from their PC desktop, eliminating the time and paper required to output a document and then transmit it from a standalone machine, and without compromising desirable fax capabilities such as polling, broadcasting, confidential transmit/receive and address book.

Versatile Network Fax Capabilities

Users can easily send and receive faxes directly from the desktop.

The CS-2050 and CS-1650 offer solutions that deliver all the critical document imaging your business demands. Solid, dependable and capable, they are backed by Copystar, one of the most respected and recognized names in the industry. From simple documents to complex printing applications, they will take your business productivity to new levels.

Digital Technology Offers Superior Copying

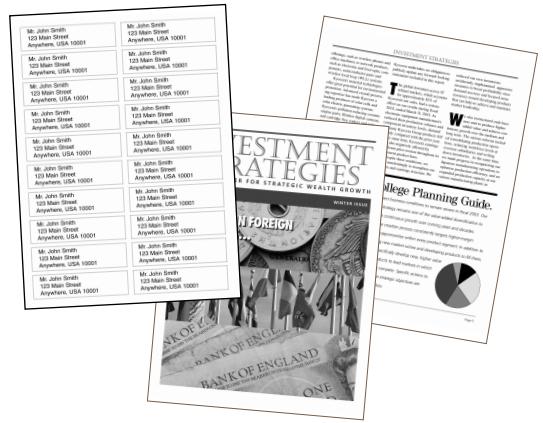

Copystar's reputation for delivering superior copier systems is unsurpassed in the industry. With output volumes of up to 30,000 pages per month, these systems were designed with the needs of a highly productive small- to medium-sized workgroup in mind.

The CS-2050 and CS-1650 are built on a solid foundation of digital technology, with **six standard imaging modes** and standard 64MB RAM, upgradeable to 256MB, making them a solid choice when it comes to copier performance. Features such as **auto magnification**, **border erase** and **margin shift** combine with various photo, text and ECO imaging modes to ensure perfect output every time. The CS-2050 comes equipped with 300 x 2 universal sheet paper drawers (300 x 1 for the CS-1650). Paper tray options expand this capacity to up to 1250 sheets, reducing time spent loading trays. For added versatility, the systems also offer an intelligent Multi-Purpose Tray that can handle assorted media types, sizes, and weights up to 90 lb. index, avoiding the need to outsource production of many types of documents.

Scan Once Print Many technology, electronic sort, and rotate sort save both time and effort, eliminating manual collating. Optional equipment offers even greater paper handling capabilities:

- **50-sheet Reversing Automatic Document Processor** allows users to scan documents quickly and efficiently.
- **Stackless Duplex Unit** allows users to image in both one-sided and two-sided modes.
- **Internal Finisher** can staple up to 30 sheets of letter-sized paper.
- **Job Separator** allows users to keep copy, print, and fax output conveniently segregated.

Both imaging solutions employ our long-life OPC Drum which, combined with our **high yield, monocomponent toner**, ensure a greater number of images with fewer interruptions - an important benefit to a busy office.

Advanced Imaging Capabilities

No matter what your imaging requirements, the CS-2050 and CS-1650 have a range of enhanced features that can accomplish the task.

User-Friendly Control Panel

The CS-2050 and CS-1650 intelligently designed control panel gives you complete control over your document output.

Long-Life Consumables

Kyocera long life consumables go far in reducing Total Cost of Ownership while boosting productivity.
